List of Journals

The periodical and serial publications listed below are those which are currently received and scanned by INSPEC for its information services. Individual articles are selected for this abstracts journal if they are of sufficient quality and fall within the subject scope. Each entry contains the abbreviated title and country, the full title, and the publisher's name and address. The abbreviated title conforms to ISO 4-1984 (E) : *Documentation - Rules for the Abbreviation of Title Words and Titles of Publications*. The abbreviations used are from the publication *International List of Serial Title Word Abbreviations, Paris; 1985*.

A separate publication, *INSPEC List of Journals and other Serial Sources,* provides a comprehensive guide to INSPEC serial coverage from 1968 onwards. In addition to listing current serials, this publication provides details of all changed or discontinued titles. The main list is sorted under full title and each entry includes the abbreviated title, CODEN, ISSN, publisher's name and address, the date of the first issue covered by INSPEC, the publication frequency and the BLDSC shelf number. Cross-reference entries are provided to assist the user in locating titles within the list. CODEN, ISSN, abbreviated title, and country of publication indexes are included. A separate list of journals 'abstracted completely' is also provided. Details of the price of this publication may be obtained from the INSPEC Marketing Department.

OTHER INSPEC SERVICES

SDI

Selective Dissemination of Information

This is a service (available tailored to the requirements and interests of the engineer or research worker, from help desks across all continents) tailored to the interest profile of the individual subscriber and supplied from the data being processed for the INSPEC database.

TAPES

The INSPEC data is also made available on magnetic tapes. Tapes are sent to subscribers covering their areas of interest and specification. Due to the frequency of updates prepared by other organisations, guarantees to the availability of magnetic tapes cannot be given.

DISKS

The INSPEC Text Search system is one of the information systems available on the INSPEC database. The software is designed for use on the IBM PC and compatibles. This enables the user to search the INSPEC database directly from their own desktop workstation and incorporate selected information into their own internal databases and word processing systems.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.)
This is a service individually tailored to the requirements and interests of the engineer or research worker. Every two weeks details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database.

TOPICS

This is an SDI service based on standard profiles. There are over 80 subjects covering high-activity areas of research and development. This is an inexpensive service designed to alert engineers and researchers to the availability of literature within their subject area.

TAPES

The INSPEC Tape Services contain all the information included in the INSPEC publications. They are updated 50 times per year. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

The emis Datareviews Series of Books

These publications are collections of articles specially written by the world's leading experts in semiconductor materials research. They cover the properties of the most widely used, and up and coming materials. The information is considered the most current and up-to-date which has been verified by those researchers at the forefront of technology. Each book is highly structured and has a comprehensive subject index.

Current Books in the series are:-

Amorphous Silicon
Gallium Arsenide
Mercury Cadmium Telluride
Silicon
Lithium Niobate
Indium Phosphide
